

Mehmet Deveci

Senior Software Engineer · Frontend-focused Full Stack (Vue/Nuxt · TypeScript · Node · AWS)

Berlin, Germany · +49 178 8980493 · deveci2024@gmail.com · volcode.org · github.com/volcodes · linkedin.com/in/deveci96

Software engineer with **10+ years** building web products across logistics, ed-tech, real estate, media and SaaS, in fast-paced startups and enterprise teams. Deep in **Vue/Nuxt and TypeScript**, comfortable end to end: React/Next.js and Electron on the client, Node.js, PHP and Java Spring Boot on the server, Docker, AWS, Terraform and CI/CD underneath. Known for shipping measurable outcomes (page speed, test coverage, infra cost), writing the RFCs that set team standards, and mentoring engineers to promotion.

EXPERIENCE

CONROO GmbH — Software Engineer (Full Stack)

Berlin, Germany · 07/2025 – Present

Vue 3, Nuxt 4, TypeScript, Vitest, Cypress, Java Spring Boot, WebRTC, GCP, Datadog

- Authored and led the **Vue 3 → Nuxt 4 migration RFC** using domain-driven design, restructuring the codebase into 5 business-domain layers across 123+ branches.
- Built **VoIP/WebRTC calling** for terminal operations: real-time call support, cancel/reject flows and heartbeat monitoring.
- Delivered backend services in **Java Spring Boot**: stale-tour cleanup job with distributed locking, mobile booking endpoints and an API gateway.
- Fixed ~100 failing tests and wrote the testing-guidelines RFC, **raising coverage to 88%**.
- Integrated **Datadog structured logging and distributed tracing** for end-to-end production observability; investigated and fixed an OIDC code-challenge vulnerability in the auth flow.
- Introduced **AI-assisted engineering**: evaluated 5 tools (Claude Code, Gemini, Copilot) and wrote the company-wide adoption guidelines.
- Authored 10+ RFCs (endpoint naming, trunk-based development, feature flags, API migration strategy) that standardised engineering practice across the team.

AIManager360 — Fractional Full Stack Developer

Berlin, Germany (remote) · 01/2025 – 06/2025

React, Next.js, TypeScript, Node.js, Docker

- Implemented **i18n/localisation** in a React/Next.js app, opening Spanish-speaking markets and **expanding reach by ~25%**.
- Built admin dashboards for validating and editing **LLM-generated data**.
- Automated the local environment with Docker, **cutting developer onboarding time by 50%**.

Sdai GmbH — Senior Frontend Developer

Berlin, Germany · 02/2023 – 06/2024

Vue/Vuex, React, TypeScript, Electron, Matrix, Cypress, Jest, Kubernetes, GitLab CI, PHP/Laravel

- Conceptualised and shipped **video conferencing** in a React/Electron encrypted messenger (Matrix), enabling 200+ school admins and teachers to schedule and launch calls.
- Rebuilt event listing, editing and scheduling flows in Vue/Vuex, **lifting user engagement by 20%** and cutting load times on listing screens.
- Upgraded privacy settings in the chat app; wrote the team's **Vue 2 → Vue 3 migration guide** and iOS notification/WebSocket docs, shortening onboarding and debugging time.
- Expanded E2E and unit coverage with Cypress, Jest and Vue Test Utils; led code reviews and pair sessions that raised junior developer velocity.

Homeday GmbH — Senior Frontend Engineer

Berlin, Germany · 03/2020 – 01/2023

Vue, Nuxt, TypeScript, Storybook, Jest, Cypress, Testing Library, Node.js, PHP/Symfony, Contentful, AWS, Docker, GitHub Actions

- Migrated 20+ legacy PHP layouts to Vue/Nuxt, **improving page speed by 20–30%** and unlocking the design system in the new app.
- Built frontend infrastructure on **AWS and GitHub Actions**, **trimming costs by 15%**; wrote Node.js CI services for deployment, asset handling and image optimisation.
- Enhanced the shared design system with Storybook, removing redundant components and **raising test coverage to 74%**; introduced integration tests that **cut pipeline time by 20%**.
- Integrated Sentry, Grafana and InfluxDB to monitor web performance across six codebases.
- Launched a structured mentorship programme (1:1s, pair programming), leading to **two promotions**; co-led the Diversity & Inclusion taskforce and ran unconscious-bias training.

- Delivered the 2018 and 2019 **election result pages** (3M+ monthly visitors) and SVG election maps serving **75k+ concurrent users** across 50+ platforms.
- Built an asset-management app (AssetHQ) from scratch with Node.js and Vue, **halving content search times** for the newsroom.
- Designed a drag-and-drop page editor and fast keyboard search, **accelerating editorial workflows by 30–50%** for 100+ staff.

Earlier: Full Stack Developer, Crabs Media (digital marketing agency), Istanbul · 07/2014 – 12/2017 — PHP/MySQL/JavaScript web apps and client sites.

SKILLS

Frontend	Vue.js, Nuxt (2–4), TypeScript, JavaScript, React, Next.js, Electron, Vite, Webpack, Tailwind, SCSS, Storybook, WebRTC, accessibility & performance tuning
Backend	Node.js, NestJS, Java Spring Boot, PHP (Laravel, Symfony), REST, GraphQL, MySQL/SQL, Contentful
Cloud & DevOps	AWS, GCP, Docker, Kubernetes, Terraform, Cloudflare Workers/R2, GitHub Actions, GitLab CI, Jenkins
Testing & Quality	Vitest, Jest, Cypress, Vue Test Utils, Testing Library, E2E/integration/snapshot strategy, TDD
Observability	Datadog (logs, tracing), Sentry, Grafana, InfluxDB
AI tooling	Claude Code, GitHub Copilot, Gemini; LLM-output validation UIs; AI adoption guidelines
Ways of working	RFC-driven design, trunk-based development, feature flags, Agile (Scrum/Kanban), mentoring, cross-functional workshops

EDUCATION

- Istanbul Arel University
- Associate's Degree, Computer Programming · 2014 – 2017
- Inonu Technical High School
- Vocational Training, Information Technologies · 2010 – 2013

CERTIFICATES & LANGUAGES

- Software Design Principles (OOP, UML, SOLID, Design Patterns) · Communicating with Emotional Intelligence · Interpersonal Communication
- English (professional working) · Turkish (native)

SELECTED PROJECTS & LINKS

- **volcode.org** — Nuxt portfolio hosted on Cloudflare via Terraform (3 Nuxt apps, Workers-based auth, R2 CDN) at zero hosting cost. github.com/volcodes/volcodeorg-app
- **Gamified reading app** — per-page progress tracking, quizzes and reading streaks for students.
